

**Natal and Transit Bi-wheel Charts**  
Calculate and display natal charts and transit bi-wheel charts with interactive interpretations — mouse click gives you interpretations for an individual planet or aspect, or for the entire chart as a whole.

**Point & Click Interpretations**

Point and click on any chart feature to get transformatively oriented descriptions. Control-click gives even more astrological information for that feature.

**Graphical Transit Timeline**

Track the eb and flow of transits over time with this graphical layout of curves representing each planet's aspects for periods of 3, 6 or 12 months.

**20+ Astrologically Significant Points**

Includes the Sun, Moon, the eight standard planets, the Lunar Nodes, Part of Fortune, and Chiron, a very significant planetary influence for our times. Optionally display the major asteroids Ceres, Pallas, Juno, and Vesta, major Centaurs such as Pholus and Nessus, Black Moon Lilith, Eris, and Sedna with general interpretations for house placement.

**Transits to House Rulers With Interpretations**

When an outer planet transits a natal planet in your chart the effects are two-fold; not only is the natal planetary archetype affected by the transiting outer planet, but also the house(s) it rules. TimePassages is the only astrology software providing these interpretations.

**Built-in ACS Atlas**

Automatically enters your latitude, longitude, time zone, and daylight time information for accurate chart calculation. Just enter the city, state, and country and it's looked up in a database with over 250,000 cities worldwide.

**Electronic User's Manual**

Includes an in-depth introduction to astrology, detailed instructions on all software features, and quick references for astrology terms and systems.

**Multiple House Calculation Methods**

Includes Koch, Placidus, Equal House, Campanus, and Porphyry. Whole sign houses new with version 5.

**Aspect Grid**

Graphic layout of aspects includes all major and minor aspects plus the parallels and contra-parallels, all with Point & Click Interpretations.

**Adjustable Aspect Orbs**

Set aspect orbs for Natal, Transit, and Comparison to display only aspects with indicated aspect strength.

**Aspect Date Ranges**

Transit interpretations optionally include the date range the transit is in effect and the time of exact aspect.

**Customizable Chart Display**

Display charts just the way you like them with display options such as fonts, background color, rimmed sign labels, day-month-year date format, aspect options, aspect orbs and more.

**Planetary Patterns**

Recognizes and interprets all classic Rudhyar-style chart patterns such as Bowl, Funnel, Seesaw, etc.

**Print Color Chart Graphics**

**MDI Interface**

TimePassages allows you to display multiple chart windows concurrently and to go back and forth between calculated charts quickly for easy reference and comparison.

**Chart Workspace Files**

Each chart file is saved and restored with the most recently used charts.

**Report Generator**

Compile complete reports with a click of the mouse, including planetary patterns and important features of the chart. Including Full Natal, Current Transits, Current Progressions, and Transit Survey Reports.

**Transit Survey Reports**

Survey transits for 3, 6, or 12 month periods, sorted by begin range, date of exact, or transiting planet, either including paragraphs of interpretation or as a hit list of important transits.

**Progressions**

Calculate and display Secondary and Solar Arc progressions with interactive

interpretations.

**Time-lapse Animation**

Animate transits and progressions to see the chart evolve over time.

**Tri-wheel Charts**

Display natal, transit, and progressed planets all on one wheel. Configurable to display any saved charts. Fully interactive with Point & Click interpretations for all three levels.

**Natal Chart Rectification**

Adjust the chart forward or backward by minutes, hours or days. Very handy when experimenting with different birth times.

**Astro Maps**

Full color satellite maps with culminating rising and setting planet lines that show you where to look for opportunity. These maps have three levels of zoom and are quite stunning.

**Solar & Lunar Return Charts**

Calculates the chart for the moment when the Sun or Moon returns to its natal position in any year or month for your current location.

**Chart Relocation**

Enables you to understand the influences surrounding your sojourn in a particular place, either for a visit or long-term, or where you currently reside. The interpretation is based on a natal report for this chart, but with the understanding that the house positions that change from your natal chart represent differences that add to your experience in the new location.

**Astro Clock**

Displays an animated now chart showing the current real positions of the planets in the sky. Watch the heavenly dance in real time, right before your eyes!

**Comparison Bi-wheel & Composite Charts**

Compare two individuals' charts, either as a Comparison Bi-wheel, with one chart surrounding the other or as a Composite chart of the two individual's put together and read as one chart. The interpretations are purchased separately, see our Add-ons.

**Midpoints**

Display natal midpoints sorted by planet or degree order, using any standard modulus from 360 to 45. Midpoint tree display is included.
